This fee schedule lists account fees and service charges that may apply to you, fees may vary depending on the account you have and the services you use. For more information about interest rates, earnings credit, fees, and other services not covered in this fee schedule, please contact your dedicated relationship manager, or call Treasury Management at 631-723-7620. Please note, fees for your account may vary from those listed in this fee schedule based on your overall relationship with us.

- 1 Analysis Checking features an earnings allowance to offset eligible fees and expenses, including certain service fees. To calculate your earnings allowance, we apply the earnings credit rate to the available collected balance in your account. The earnings credit rate is a variable rate that the Bank can change at any time. The rate appears on your client analysis statement. If your earnings allowance is greater than the total eligible fees for a given statement period, we won't credit that amount to your account or carry it forward to the following statement period. In any statement period where your fees exceed your earnings allowance, we'll debit your account or invoice you for the difference.
- 2 Subject to Dime approval
- 3 Based on activity and items processed
